सर्वसाधारणलाई सेयर जारी गरेपश्चात संस्थाको पूँजी २४ करोड पुगेको कारण सेवा प्रबर्धनमा सहज भएको छ। यसबाट संस्थाको व्यवासायिक क्षमता बृद्धि भएको छ। पछिल्लो समय लघुवित्त क्षेत्रमा विभिन्न प्रकारका कानूनी व्यवस्थामा परिमार्जन भएका छन। एक ग्राहक सदस्यले एक संस्थाबाट मात्र कर्जा लिन पाउने तथा＂क＂，＂ख＂，＂ग＂वर्गमा कर्जा लिएका सदस्यले＂घ＂वर्गको लघुवित्त वित्तीय संस्थाबाट कर्जा लिन नपाउने व्यवस्था भएकले सो लाई मध्यनजर गर्दै थप गुणस्तरीय सेवाको व्यवस्था तथा ग्राहक सदस्यको सबलीकरणलाई उच्च प्राथमिकता दिईनेछ।

नेपाल राष्ट्र बैंकबाट नियमानुसार प्राप्त सल्लाह सुभावहरु, जारी निर्देशनलाई परिपालना गदै संस्थागत विकास गर्ने लक्ष्य राखिएको छ। लघुवित्त संस्थाहरुले ग्रामीण क्षेत्रमा प्रदान गरेको लघुवित्त सेवाको महत्व, कार्यप्रणाली तथा सेवाको अवस्था सम्बन्धमा नियमित रुपमा स्थानीय निकायका पदाधिकारीसहित ग्राहक सदस्य तथा समुदायलाई विभिन्न कार्यक्रमहरु मार्फत जानकारी गराई लघुवित्त प्रति सकारात्मक धारणाको विकास गर्नका लागि शाखा तथा केन्द्रीय कार्यालय स्तरबाट विभिन्न स्थलगत तथा गैर स्थलगत कार्यकम संचालन गदै आइरहेकोमा थप रणनीतिक योजनाको तर्जुमा तथा कार्यान्वयन गरै लगिने योजना रहेको छ। यस प्रकारको कार्यबाट लघुवित्त प्रति सकारात्मक धारणाको विकास भई संस्थागत सुशासन हुनका साथै कर्जा लगानी तथा अयुलीमा देखिएको जोखिम न्युनीकरण हुने विश्वास लिइएको छ।

# INDEPENDENT AUDITOR'S REPORT TO THE SHAREHOLDERS OF AVIYAN LAGHUBITTA BITTIYA SANSTHA LIMITED 

## Report on the Audit of the Financial Statements

## Opinion

We have audited the accompanying financial statements of Aviyan Laghubitta Bittiya Sanstha Limited ("Microfinance") which comprise the Statement of Financial Position as at Ashad 32, 2079 (July 16, 2022), the Statement of Profit or Loss (including Other Comprehensive Income), the Statement of Changes in Equity and the Statement of Cash Flows for the year then ended on that date, and a summary of the significant accounting policies and other explanatory information (hereafter referred to as "the Financial Statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid financial statements presents fairly, in all material respects, the financial position of the Microfinance, as at Ashad 32, 2079 (July 16, 2022) and its financial performance, changes in equity, cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information, in accordance with Nepal Financial Reporting Standards with allowed carveouts, comply with Company Act, 2063 and Bank and Financial Institution Act, 2073.

## Basis for Opinion

We conducted our audit of the financial statements in accordance with Nepal Standards on Auditing (NSAs). Our responsibilities under those Standards are further described in the Auditors Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Microfinance in accordance with the Handbook of The Code of Ethics for Professional Accountants issued by the Institute of Chartered Accountants of Nepal (ICAN), and we have fulfilled our other ethical responsibilities in accordance with the ICAN's Handbook of The Code of Ethics for Professional Accountants. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the financial statements.

## Key Audit Matters: our assessment of risks of material misstatement

Key audit matters are those matters that, in our professional judgement, were of most significance in audit of the financial statements of current period. These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined the matters described below to be the key audit matters to be communicated in our report:

## Key Audit Matter

Information Technology (IT) System
The Information Technology of the Microfinance involves a large number of IT systems that are used to process and record a large volume of transactions in the Microfinance's activities.
As a result, Microfinance's financial accounting and recording procedure places a significant level of reliance and rely on such IT systems.

## How Key Audit Matters were addressed

Our audit approach regarding Information Technology of the Microfinance included:
We conducted the detail understating and testing regarding the existing system via enquiry, re-performance and inspection to the extent of our knowledge.
a) Verification of Loans and Advances impairment based on aging on a test check basis.

b) Reviewed the reports generated by the systems on a sample basis.
c) Verified Interest Income and expense booking for loans and deposits using the Microfinance's System on test basis.

## Emphasis of Matters

Without qualifying our opinion, we draw attention to 3.13 (b)(ii) of Notes to the Financial Statements, that for Gratuity, the liability to be recognized in the Statement of Financial Position is the present value of the defined benefit obligation less the fair value of plan assets. The Microfinance accounts for the liability for the gratuity as per the management calculation. Likewise, the company has contributed @ $8.33 \%$ of the basic salary as per the provisions of existing bylaws of the organization. The microfinance has computed provision and liabilities for Gratuity without considering Actuarial valuation.
Likewise, the microfinance has computed provision and liabilities for leave without considering Actuarial valuation.

## Other Matters

Aviyan Laghubitta Bittiya Sanstha Limited has also prepared separate financial statements in accordance with the directive issued by Nepal Rastra Bank to Microfinance for the year ending Ashad 32, 2079 ( 16 July, 2022). We have issued separate audit report on $21^{\text {th }}$ March, 2023 to the shareholders of Microfinance on such regulatory financial statements.

## Information Other than the Financial and Auditor's Report Thereon

Microfinance's Management is responsible for the preparation of the other information. The other information comprises the information included in the Management Report, Report of the Board of Directors and Chairman's statement but does not include the financial statements and our auditors report thereon.
Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.
In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

## Responsibility of Management and Those Charged with Governance for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial Statements in accordance with Nepal Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud and error.
In preparing the financial statements, management is responsible for assessing Microfinance ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate Microfinance or to cease operations, or has no realistic alternative but to do so.
The Board of Directors are responsible for overseeing Microfinance financial reporting process.

## Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with NSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.
As part of an audit in accordance with NSAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements. whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtained audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Microfinance's internal control.
- Evaluate the appropriateness of accounting policies used and tie reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on Microfinance ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause Microfinance to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements. including be disclosures, and financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within Microfinance to express an opinion in the financial statements. We are responsible for the direction, supervision and performance of the audit. We remain solely responsible for our audit opinion.
We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.
We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

## Report on Other Legal and Regulatory Requirements

We have obtained satisfactory information and explanations asked for, which to the best of our knowledge and belief were necessary for the purpose of our audit; the returns received from the branch offices of Microfinance, though the statements are independently not audited, were adequate for the purpose of audit; the financial statements including statement of financial position, statement of profit or loss, statement of comprehensive income, statement of changes in equity, statement of cash flows including a summary of significant accounting policies and other explanatory notes have been prepared in all material respect in accordance with the provisions of the Company Act-2063, and they are in agreement with the books of accounts of the Microfinance; and the accounts and records of the Finance are properly maintained in accordance with the prevailing laws.
To the best of our information and according to the explanations given to us in the course of our audit, we observed that the loan has not been written off; the business of Microfinance was conducted satisfactorily, and Microfinance transactions were found to be within the scope of its authority. We did not come across cases of accounting related fraud and the cases where the Board of Directors or any employee or any office bearer of Microfinance has acted contrary to the provisions of law or caused loss or damage to Microfinance or committed any misappropriation of the funds of Microfinance.

## 5 Disclosure and Additional Information

### 5.1. Risk Management

Risk taking is an inherent part of financial institutions providing microfinance services, as it provides financial services to low income groups and individuals. Thus, management of risk plays a crucial role in smooth running of any microfinance and failure in doing so can have devastating consequences.

In order to manage the risks that come with running a business, the Laghubitta has established a separate Integrated Risk Management Department (IRMD). IRMD oversees risks that arise from everyday operations as well as looks at global and domestic outlook and its potential implications on microfinance. The findings of this analysis are then presented to Senior Management, the Risk Management Committee, and the Board for discussion. If necessary, instructions are issued based on these findings.

## i. Risk Management Committee:

The Risk Management Committee (RMC) is an independent committee headed by a non-executive Director, responsible for overall risk management in the Laghubitta and to oversight the implementation of risk management framework in the Laghubitta. It periodically reviews the risk management process to ensure its integrity, accuracy, and reasonableness. It also reviews whether the internal control and risk management system is adequate or not to ensure well-ordered and prudent conduct of business. The committee is to review the overall risk management structure and monitor the effectiveness of the risk management system. Currently, the Risk Management Committee comprises of following Members:

The Laghubitta's risk governance structure is such that the responsibility for maintaining risk within the Laghubitta risk blanket is cascaded down from the Board to the appropriate functional, senior management and committees. The Board has set policies and procedures of risk identification, risk evaluation, risk mitigation, and control/ monitoring in line with NRB directives, and has effectively implemented the same.

### 5.1.2. Market Risk

Market risk can be defined as the possibility for loss of earnings or economic value to the microfinance caused due to adverse changes in the market level of interest rates or prices of securities (equity) and volatilities of those prices. The Laghubitta has an Asset Liability Management Committee (ALCO) which meets periodically to discuss product pricing for deposits and advances and maturity profiles of assets and liabilities, articulating interest rate, funding policy and balance sheet management. After understanding the market conditions and demands; the Board and the management bring programs to suit the potentials and conditions of the market, and reduce the risk by providing appropriate responsibilities to the employees from the top to the bottom based on their capabilities. For this, the internal control system has been strengthened.

### 5.1.3. Liquidity Risk

Liquidity risk is defined as the risk that the Laghubitta will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash. Liquidity risk arises because of the possibility that the Laghubitta might be unable to meet its payment obligations when they fall due as a result of mismatches in the timing of the cash flows under both normal and stress circumstances. Such scenarios could occur if the Laghubitta is unable to obtain funding for liquid asset positions on acceptable terms. Laghubitta is unable to invest in accordance with customer demand and is also unable to repay savings and other legal obligations on time due to a lack of liquidity. To limit this risk, Laghubitta has arranged for diversified funding sources in addition to its core deposit base and adopted a policy of managing assets with liquidity in mind and monitoring future cash flows and various liquidity ratios periodically. Further to this, Laghubitta conducts periodic stress testing to analyze possible outcome.

### 5.1.4. Operational risk

Operational Risk is pervasive across all the functions of the Laghubitta and is influenced by all resources, including human resource, systems and procedural designs, deployed by the Laghubitta to carry out those functions. Operational Risk can be caused by both internal and external sources such as fraud, business interruptions, system failures, damage to physical infrastructure, failure in execution and service delivery, inherent risks in products, customers, inadequacy in procedures or flawed process designs, and business practices. The risk can occur in any business function or the business supporting functions.
The Laghubitta is committed to be governed with a strong culture of risk management and ethical business practices and therefore to averse it from potentially damaging operational risk events and is in a sound position to deal effectively with those events that do occur. The adequacy and effectiveness of the policies and procedures rolled out by Laghubitta and their effective implementation is closely monitored by the department to ensure that they have continuing relevance in line with regulatory requirement and adjusts to dynamic risk environment of the industry.

### 5.1.5. Interest Rate Risk

## A financial asset is held for trading if:

- it has been acquired principally for the purpose of selling it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking; or
- it is a derivative that is not designated and effective as a hedging instrument or a financial guarantee.

Dividends on these investments in equity instruments are recognized in Statement of Profit and Loss when the Microfinance's right to receive the dividends is established, it is probable that the economic benefits associated with the dividend will flow to the entity, the dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably. Dividends recognized in Statement of Profit and Loss are included in the 'Other income' line item.

## Financial assets at fair value through profit or loss (FVTPL)

Investments in equity instruments are classified as at FVTPL, unless the Microfinance irrevocably elects on initial recognition to present subsequent changes in fair value in other comprehensive income for investments in equity instruments which are not held for trading.

Debt instruments that do not meet the amortized cost criteria or FVTOCI criteria (see above) are measured at FVTPL. In addition, debt instruments that meet the amortized cost criteria or the FVTOCI criteria but are designated as at FVTPL are measured at FVTPL.

A financial asset that meets the amortized cost criteria or debt instruments that meet the FVTOCI criteria may be designated as at FVTPL upon initial recognition if such designation eliminates or significantly reduces a measurement or recognition inconsistency that would arise from measuring assets or liabilities or recognizing the gains and losses on them on different bases.

Financial assets at FVTPL are measured at fair value at the end of each reporting period, with any gain or loss arising on re-measurement recognized in Profit and Loss. The net gain or loss recognized in Statement of Profit and Loss incorporates any dividend or interest earned on the financial assets and is included in 'other income' line item. Dividend on financial asset at FVTPL is recognized when the company's right to receive the dividend is established, it is probable that the economic benefits associated with the dividend will flow to the entity, the dividend does not represent a recovery of part of cost of the investment and the amount of dividend can be measured reliably.

## Financial liabilities at FVTPL

Financial liabilities are classified as at FVTPL when the financial liability is held for trading or is designated as at FVTPL.
A financial liability is classified as held for trading if:

- it has been incurred principally for the purpose of repurchasing it in the near term; or
- on initial recognition it is part of a portfolio of identified financial instruments that the Company manages together and has a recent actual pattern of short-term profit-taking; or

A financial liability other than a financial liability held for trading may be designated as at FVTPL upon initial recognition if:

- such designation eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise;
- the financial liability forms part of a company of financial assets or financial liabilities
or both, which is managed and its performance is evaluated on a fair value basis, in accordance with the Company's documented risk management or investment strategy, and information about the Company is provided internally on that basis; or
- it forms part of a contract containing one or more embedded derivatives, and NFRS 9 permits the entire combined contract to be designated as at FVTPL in accordance with NFRS 9

Financial liabilities at FVTPL are stated at fair value, with any gains or losses arising on remeasurement recognized in Statement of Profit and Loss. The net gain or loss recognized in Statement of Profit and Loss incorporates any interest paid on the financial liability and is included in the 'Other income' line item.

However, for non-held-for-trading financial liabilities that are designated as at FVTPL, the amount of change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is recognized in other comprehensive income, unless the recognition of the effects of changes in the liability's credit risk in other comprehensive income would create or enlarge an accounting mismatch in profit or loss, in which case these effects of changes in credit risk are recognized in Statement of Profit and Loss. The remaining amount of change in the fair value of liability is always recognized in Statement of Profit and Loss. Changes in fair value attributable to a financial liability's credit risk that are recognized in other comprehensive income are reflected immediately in retained earnings and are not subsequently reclassified to Statement of Profit and Loss.

## Financial liabilities subsequently measured at amortized cost

Financial liabilities that are not held-for-trading and are not designated as at FVTPL are measured at amortized cost at the end of subsequent accounting periods. The carrying amounts of financial liabilities that are subsequently measured at amortized cost are determined based on the effective interest method. Interest expense that is not capitalized as part of costs of an asset is included in the 'Finance Expenses' line item.
The effective interest method is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period.

## De-recognition

## i. De-recognition of financial assets

The Microfinance derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or when it transfers the financial asset in a transaction in which substantially all the risks and rewards of ownership of the financial asset are transferred or in which the Microfinance neither transfers nor retains substantially all the risks and rewards of ownership and it does not retain control of the financial asset.

Any interest in such transferred financial assets that qualify for de-recognition that is created or retained by the Microfinance is recognized as a separate asset or liability. On de-recognition of a financial asset, the difference between the carrying amount of the asset, and the sum of (i) the consideration received and (ii) any cumulative gain or loss that had been recognized is recognized in Statement of Profit or Loss.

The Microfinance enters into transactions whereby it transfers assets recognized on its Statement of Financial Position, but retains either all or substantially all of the risks and rewards of the transferred assets or a portion of them, then the transferred assets are not derecognized.

## ii. De-recognition of financial liabilities

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expired. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognized in Statement of Profit or Loss.

## Determination of fair value

'Fair value' is the price that would be received to sell an asset or paid to transfer a liability (exit price) in an orderly transaction between market participants at the measurement date in the principal or, in its absence, the most advantageous market to which the Microfinance has access at that date. The fair value of a liability reflects its non-performance risk.

When available, the Microfinance measures the fair value of an instrument using the quoted price in an active market for that instrument. A market is regarded as active if transactions for the asset or liability take place with sufficient frequency and volume to provide pricing information on an ongoing basis. If there is no quoted price in an active market, then the Microfinance uses valuation techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

The fair value measurement hierarchy is as follows:
Level 1: fair value measurements are those derived from unadjusted quoted prices in active market for identical assets or liabilities.

Level 2: Valuations are those with quoted prices for similar instruments in active markets or quoted price for identical or similar instruments in inactive markets and financial instruments valued using models where significant inputs are observable.

Level 3: portfolios are those where there are unobservable inputs of the instruments. The inputs are not based on observable market data.

## Impairment

At each reporting date, the Microfinance assesses whether there is objective evidence that a financial asset or group of financial assets not carried at fair value through profit or loss are impaired. A financial asset or a group of financial assets is impaired when objective evidence demonstrates that a loss event has occurred after the initial recognition of the asset(s), and that the loss event has an impact on the future cash flows of the asset(s) that can be estimated reliably.

Objective evidence that financial assets are impaired include significant financial difficulty of the borrower or issuer, default or delinquency by a borrower, restructuring of a loan or advance by the Microfinance on terms that the Microfinance would not otherwise consider, indications that a borrower or issuer will enter Bankruptcy, the disappearance of an active market for a security, or other observable data relating to a group of assets such as adverse changes in the payment status of borrowers or issuers in the group, or economic conditions that correlate with defaults in the group. In addition, for an investment in an equity security, a significant or prolonged decline in its fair value below its cost is objective evidence of impairment.

In case of financial difficulty of the borrower, the Microfinance considers to restructure loans rather than take possession of collateral. This may involve extending the payment arrangements and agreement of new loan conditions. Once the terms have been renegotiated, any impairment is measured using the original EIR as calculated before the modification of terms and the loan is no longer considered past due. Management continually reviews renegotiated loans to ensure that all criteria are met and that future payments are likely to occur. The loans continue to be subject to an individual or collective impairment assessment, calculated using the loan's original EIR.

## Impairment of financial assets measured at amortized cost

The Microfinance considers evidence of impairment for loans and advances and investment securities measured at amortized cost at both specific asset and collective level. The Microfinance first assesses individually whether objective evidence of impairment exists for financial assets that are individually significant and that are not individually significant are assessed collectively.

If there is objective evidence on that an impairment loss has been incurred, the amount of the loss is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows. The carrying amount of the asset is reduced through the use of an allowance account and the amount of the loss is recognized in profit or loss. Interest income continues to be accrued on the reduced carrying amount and is accrued using the rate of interest used to discount the future cash flows for the purpose of measuring the impairment loss.

#### Abstract

All individually significant loans and advances and investment securities are assessed for specific impairment. Those found not to be specifically impaired are then collectively assessed for any impairment that has been incurred but not yet identified. Loans and advances and investment securities that are not individually significant are collectively assessed for impairment by grouping together loans and advances and investment securities with similar risk characteristics.

Impairment of loans and advances portfolios is based on the judgments in past experience of portfolio behavior. In assessing collective impairment the Microfinance uses historical trends of the probability of default, the timing of recoveries and the amount of loss incurred, adjusted for management's judgment as to whether current economic and credit conditions are such
that the actual losses are likely to be greater or less than suggested by historical trends. Default rates, loss rates and the expected timing of future recoveries are regularly benchmarked against actual outcomes to ensure that they remain appropriate.

Impairment losses on assets measured at amortized cost are calculated as the difference between the carrying amount and the present value of estimated future cash flows discounted at the asset's original effective interest rate.

Loans together with the associated allowance are written off when there is no realistic prospect of future recovery and all collateral has been realized or has been transferred to the Microfinance. If in a subsequent year, the amount of the estimated impairment loss increases or decreases because of an event occurring after the impairment was recognized, the previously recognized impairment loss is increased or reduced by adjusting the allowance account. If a write off is later recovered, the recovery is recognized in the 'Other Operating Income'.

## Impairment of investment in equity instrument classified as fair value through other comprehensive income

Objective evidence of impairment of investment in an equity instrument is a significant or prolonged decline in its fair value below its cost. Impairment losses are recognized by reclassifying the losses accumulated in the fair value reserve in equity to profit or loss. The cumulative loss that is reclassified from equity to profit or loss is the difference between the acquisition cost, net of any principal repayment and the current fair value, less any impairment loss recognized previously in profit or loss.

### 3.4 Trading Assets

Interest income on all trading assets is considered to be incidental to the microfinance's trading operation and are presented together with all other changes in fair value of trading assets and liabilities in net trading income.

Interest expense on all trading liabilities is considered to be incidental to the microfinance's trading operation and are presented together with all other changes in fair value of trading assets and liabilities in net trading income.

### 3.5 Property and Equipment

## Recognition and Measurement

Property and Equipment are recognized if it is probable that future economic benefits associated with the assets will flow to the Microfinance and the cost of the asset can be reliably measured. The cost includes expenditures that are directly attributable to the acquisition of the assets. Cost of self-constructed assets includes followings:

- Cost of materials and direct labor;
- Any other cost directly attributable to bringing the assets to the working condition for their intended use; and
- Capitalized borrowing cost

Subsequent expenditure is capitalized if it is probable that the future economic benefits from the expenditure will flow to the entity. Ongoing repairs and maintenance to keep the assets in working condition are expensed as incurred.

Property and Equipment are measured at cost less accumulated depreciation and accumulated impairment loss if any. Neither any class of the property and equipment are measured at revaluation model nor is their fair value measured at reporting date.

Subsequent expenditure is capitalized if it is probable that the benefits from the expenditure will flow to the entity. Ongoing repairs and maintenance to keep the assets in working condition expensed as incurred.

## Depreciation

The microfinance had the policy of depreciating Property and equipment on Diminishing value method (WDV). Depreciation is charged from the date when the asset is put to use, and such amount is recognized in profit or loss. Charging of depreciation is ceased from the earlier of the date from which the asset is classified as held for sale or is derecognized.

The estimated useful lives of significant items of property and equipment for current year and comparative periods are as follows:

| Class of Assets | Useful Life | Rate of Depreciation |
| :---: | :---: | :---: |
| Office Equipment | 5 years | $25 \%$ |
| Vehicles | 5 years | $20 \%$ |
| Computer (Including Printer) | 5 years | $20 \%$ |
| Furniture and Fixtures | 5 years | $20 \%$ |
| Leasehold Improvements | 5 years | $20 \%$ |
| Building | 40 years | $2.5 \%$ |

The capitalized value of Software purchased and installation costs are amortized over a maximum 5 years period or within ownership period.

Assets with costs less than NPR 2,000 are charged off on purchase as revenue expenditure.

### 3.6 Intangible Assets

Intangible assets with finite useful lives that are acquired separately are carried at cost less accumulated amortization and accumulated impairment losses.

Intangible assets with indefinite useful lives are tested for impairment annually either individually or at the cash generating unit level. Such intangibles are not amortized. The useful
life of an intangible asset with an indefinite life is reviewed annually to determine whether indefinite life assessment continues to be supportable. If not, the change in the useful life assessment from indefinite to finite is made on a prospective basis.

The intangible asset with finite useful lives are amortized over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortization period and the amortization method for an intangible asset with a finite useful life are reviewed at least at each financial year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are accounted for by changing the amortization period or method, as appropriate, and are treated as changes in accounting estimates. The amortization expense on intangible assets with finite lives is recognized in the statement of profit or loss.

Gains or losses arising from de-recognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit or loss when the asset is derecognized.

Certain computer software costs are capitalized and recognized as intangible assets based on materiality, accounting prudence and significant benefits expected to flow therefrom for a period longer than one year.

The estimated useful lives of significant items of intangible assets for current year and comparative periods are as follows:

| Class of Assets | Useful Life |
| :--- | :--- |
| Computer software | 5 years |

### 3.7 Investment Property

Investment property is the land or building or both held either for rental income or for capital appreciation or for both, but not for sale in ordinary course of business and owner-occupied property.

### 3.8 Income Tax

The Microfinance is subject to tax laws of Nepal. Income taxes have been calculated as per the provisions of the Income Tax Act, 2058.

Income Tax expense comprises current tax and deferred tax. Current tax and deferred tax are recognized in profit or loss except to the extent they relate to the items recognized directly in equity or in other comprehensive income.

## Current Tax

Current tax is the tax payable or receivable on the taxable income or loss for the year using tax rates that are enacted or substantially enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date in the countries where the Company operates and generates taxable income. Current income tax assets and liabilities also include adjustments for tax expected to be payable or recoverable in respect of previous periods.

## Deferred Tax

Deferred tax is recognized in respect of temporary differences between the carrying amount and tax base of assets and liabilities; and carry forward of unused tax losses. Deferred tax is measured at the tax rate that is expected to be applied to temporary differences when they reverse, using tax rate enacted or substantially enacted at the reporting date. Deferred tax assets are recognized only to the extent that it is probable that future taxable profits will be available against which it can be utilized

Deferred tax assets are reviewed at each reporting date and appropriately adjusted to reflect the amount that is reasonably/ virtually certain to be realized.

Deferred tax asset and deferred tax liabilities are offset if all of the following conditions met:
a) if there is a legally enforceable right to offset the current tax liabilities and assets;
b) the taxes are levied by the same authority on the same tax entity; and
the entity intends to settle the current tax liabilities and assets on net basis or the tax assets and liabilities will be realized simultaneously.

### 3.9 Deposits, Debt Securities Issued and Subordinated Liabilities

Microfinance deposits consist of money placed in the Microfinance by the customer. These deposits are made to various saving deposit account. Details and further disclosure about deposits have been explained in Notes that follows.

### 3.10Provisions

Provisions are recognized when the Microfinance has a present legal or constructive obligation as a result of a past event, when it is probable that an outflow of resources will be required to settle the obligation and when the amount can be reliably estimated.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (when the effect of the time value of money is material).

१२弓 | वार्षिक प्रतिवेदन, २०७८/०७९

When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, a receivable is recognized as asset if it is virtually certain that reimbursement will be received and the amount of the receivable can be measured reliably.

A disclosure for contingent liabilities is made where there is:

- a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity; or
- present obligation that arises from past events but is not recognized because:
- It is not probable that an outflow of resources embodying economic benefits will be required to settle the obligation; or
- The amount of the obligation cannot be measured with sufficient reliability.

A contingent asset is a possible asset that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the entity.

Commitments include the amount of purchase order (net of advances) issued to parties for completion of assets.

Provisions, contingent liabilities, contingent assets and commitments are reviewed at each reporting period.

Provisions for onerous contracts are recognized when the expected benefits to be derived by the Microfinance from a contract are lower than the unavoidable costs of meeting the future obligations under the contract.

### 3.11Revenue Recognition

Revenue comprises of interest income, fees and commission, disposal income, etc. Revenue is recognized to the extent it is probable that the economic benefits will flow to the Microfinance and the revenue can be reliably measured. Revenue is not recognized during the period in which its recoverability of income is not probable. The bases of incomes recognition are as below:

## Interest income

As per the requirement of NFRS, interest income is recognized in profit or loss using effective interest method, except for those classified at fair value through profit or loss. Effective Interest Rate is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument or a shorter period, where appropriate, to the net carrying amount of the financial asset or financial liability. The calculation of effective interest rate includes all charges and fee paid or received that are integral part of the effective interest only if considered necessary. Such a charge is not amortized over the life of the loan and advances as the income so recognized closely approximates the income that would have derived under effective interest method and are recognized directly in statement of profit and loss.
Interest income presented in Statement of Profit or Loss includes:

Interest income on financial assets measured at amortized cost calculated on an effective interest rate method, except for loans and advances.
As per carve out on NAS 39 Para 9, the Group has not included the fees and points paid or received in loans and advances that are immaterial or impracticable to determine reliably the effective interest rate and have recognized them directly as revenue in the Statement of Profit or Loss.
Similarly, as per carve out on NAS 39 AG 93, the Bank has applied the effective interest rate to the gross carrying amount of a financial asset unless the financial asset is written off either partially or fully.
Interest on investment securities measured at fair value is calculated on effective interest rate.
Interest income on all trading assets are considered to be incidental to the Laghubitta's trading operations and are presented together with all other changes in fair value of trading assets and liabilities in net trading income.
Interest income accrued but not received from Performing Loan and Advance till date has been recognized in the current year interest income.

Interest income on Loans and Advances is recognized as per the Guideline on Recognition of Interest Income, 2019 issued by NRB. Out of Total Interest Accrued of Rs.251,572,828.91 During the financial year, Interest Accrued from Performing Loan is Rs.199,724,456.47 And from Non-Performing Loan is Rs. $51,848,372.44$.

## Fees and Commission

Fees and commission income that are integral to the effective interest rate on a financial asset are included in measurement of effective interest rate. Other fees and commission income including management fee, prepayment Charge, penal Charges etc are recognized as the related service are performed.

## Net Trading Income

Trading income/ loss is recognized for all realized interest, dividend and foreign exchange differences including any unrealized changes in fair value of trading assets and liabilities. The trading income and loss are netted off and disclosed separately in Statement of Profit or Loss.

### 3.12Interest Expense

Interest expense including all other fees and service charge on all financial liabilities are recognized in profit or loss. The interest expenses so recognized closely approximates the interest expenses that would have been derived under effective interest rate method.

### 3.13Employee Benefits

## a. Short Term Employee Benefits

Short term employee benefit obligations are measured on an undiscounted basis and are expensed as the related service is provided. A liability is also recognized for the amount expected to be paid under bonus required by the Bonus Act to pay the amount as a result of past service provided by the employee and the obligation can be estimated reliably under short term employee benefits.

Short term employee benefits include all the following items (if payable within 12 months after the end of the reporting period):

- wages, salaries and social security contributions;
- paid annual leave and paid sick leave
- profit-sharing and bonuses; and
- non-monetary benefits

## b. Post-Employment Benefit Plan

Post-employment benefit plan includes followings

## i. Defined Contribution Plan

A defined contribution plan is a post-employment benefit plan under which an entity pays a fixed contribution to a separate entity and has no legal or constructive obligation to pay future amounts. Obligations for contributions to defined contribution plans are recognized as personnel expense in profit or loss in the periods during which the related services are rendered by employees. Prepaid contributions are recognized as an asset to the extent that cash refund or reduction in future payments is available. Contributions to a defined contribution plan being due for more than 12 months after the end of the period in which the employee render the service are discounted at their present value. The following are the defined contribution plan provided by the Microfinance to its employees:

## - Employees Provident Fund

In accordance with law, all employees of the Microfinance are entitled to receive benefits under the provident fund, a defined contribution plan in which both the employee and the Microfinance contribute monthly at a pre-determined rate (currently, $10 \%$ of the basic salary plus grades). Microfinance does not assume any future liability for provident fund benefits other than its annual contribution.

## ii. Defined Benefit Plans

A defined benefit plan provided by microfinance to its employee are as follows: -

## - Gratuity

For defined benefit plans, the liability to be recognized in the Statement of Financial Position is the present value of the defined benefit obligation less the fair value of plan assets. The Microfinance accounts for the liability for the gratuity as per the management calculation.

Likewise, the company has contributed @ $8.33 \%$ of the basic salary as per the provisions of existing bylaws of the organization. The microfinance has computed provision and liabilities for Gratuity without considering Actuarial valuation.

## - Leave Salary

The employees of the Microfinance are entitled to carry forward a part of their unveiled/ unutilized leave subject to a maximum limit. The employees can encase unveiled/ unutilized leave partially in terms of Employee Service Bye laws of the Microfinance. The microfinance has computed provision and liabilities for leave without considering Actuarial valuation.

### 3.14Leases

IFRS 16 provides two methods for the time application of the standard; namely full retrospective application and modified retrospective application. The Laghubitta has adopted modified retrospective approach. Under the modified retrospective approach, for leases previously classified as operating leases, the lease liability is measured at the present value of the remaining lease payments and discounted using the incremental borrowing rate at the date of initial application. The right-of-use asset is measured at an amount equal to lease liability adjusted by operating lease liability as per NAS 17 relating to that lease at the initial application. Right-of-use assets are measured at cost, less any accumulated depreciation. The right-of-use assets are depreciated on a straight-line basis over the remaining lease term.
The discount rate that is used to measure the liability is the incremental borrowing rate for the Laghubitta as the rate implicit in the lease cannot be readily determined. The incremental borrowing rate is determined by using a rate that is readily observable, such as the standard borrowing rate for Laghubitta like bank rate.

### 3.15Share Capital and Reserves

The Laghubitta classifies capital instruments as financial liabilities or equity instruments in accordance with the substance of the contractual terms of the instruments. Equity is defined as residual interest in total assets of the Laghubitta after deducting all its liabilities. Common shares are classified as equity of the Laghubitta and distributions thereon are presented in statement of changes in equity.
Dividends on ordinary shares classified as equity are recognized in equity in the period in which they are paid.
Incremental costs directly attributable to the issue of an equity instrument are deducted from the initial measurement of the equity instruments considering the tax benefits achieved thereon.
The reserves include retained earnings and other statutory reserves such as general reserve, Capital Reserve, regulatory reserve, investment adjustment reserve, Client protection fund, Employee training fund, Deferred tax reserve, CSR reserve etc.

### 3.16Earnings per share including diluted

Basic earnings per share is computed by dividing the profit/(loss) for the year by the weighted average number of equity shares outstanding during the year.

Diluted earnings per share is computed by dividing the profit/(loss) for the year as adjusted for dividend, interest and other charges to expense or income (net of any attributable taxes) relating to the dilutive potential equity shares, by the weighted average number of equity shares considered for deriving basic earnings per share and the weighted average number of equity shares which could have been issued on the conversion of all dilutive potential equity shares. Potential equity shares are deemed to be dilutive only if their conversion to equity shares would decrease the net profit per share from continuing ordinary operations. Potential dilutive equity shares are deemed to be converted as at the beginning of the period, unless they have been issued at a later date.

There are no instruments, such as convertibles, that would require dilution of EPS.

### 3.17Segment Reporting

The Laghubitta has identified the reportable segment as the business activities from which it earns revenues and incurs expenses whose operating results are reviewed by the management to make decision about resource allocation to each segment and assess its performance. The Laghubitta's has identified seven segments namely: Province 1, Madesh Province, Bagmati Province, Gandaki Province, Lumbini Province, Karnali Province and Sudurpaschim Province as the seven operating segment and the segment report is set out in Notes 5.4.

Segment report include items directly attributable to a segment as well as those that can be allocated on a reasonable basis. The income, expenses, assets \& liabilities that cannot be allocated to aforesaid segment or those related to head office are unallocated are included in Bagmati. The unallocated items generally comprise of head office assets, head office expenses, and tax assets and liabilities. The geographical segment has been identified on the basis of the location of the branches in 7 different provinces of the country.

## 5. Disclosures \& Additional Information

### 5.1 Risk Assessment and Management

## Liquidity Risk

Liquidity risk is the risk that the Microfinance may be unable to meet short term financial demands. This usually occurs due to the inability to convert a security or hard asset to cash without a loss of capital and/or income in the process.

Factors of Liquidity Risk includes Deterioration in quality of credit portfolio Concentrations in either assets or liabilities, Rapid asset growth funded by highly volatile large deposits. A large size of off-balance sheet exposure

The Microfinance has applied following mitigate for the management of Liquidity Risk

- Appropriate composition of assets and liabilities.
- Diversified and stable sources of funds
- Access to inter-bank, market
- Contingency funding plan for crisis situations
- Regular stress testing
- Cushion of liquid assets held
- Consistent analysis using liquidity ratios
- Review of Deposit Mix Concentration.

Such mitigates are monitored by BOD, Finance and Credit Department, Internal Audit Department.

## Credit Risk

A credit risk is the risk of default on a debt that may arise from a borrower failing to make required payments. In the first resort, the risk is that of the lender and includes lost principal and interest, disruption to cash flows, and increased collection costs. Factors for the credit risk include Counterparty Risk, Concentration Risk and Securitization Risk.

The Microfinance has applied following mitigates for management of Credit Risk factors:

- Independent and ongoing credit quality review
- Limiting credit exposures
- Problem credit management system
- Diversification of risk asset portfolio among several sectors and sub sectors of the economy over a large number of customers
- Deposit of borrower in bank, cash margin and additional collateral at individual level
- Proper valuation, storage, maintenance and insurance of collaterals

Such mitigates are monitored by Board of Directors, Risk Management Committee which is Board Level Committee, Credit Risk Management Department. NRB Inspection team and Internal Audit Department of the Microfinance

## Fair value of Financial Assets and Liabilities

Fair Value of financial assets and liabilities risk management includes effective portfolio management by finance department which is monitored by BOD. and other high level, officials.

### 5.2 Capital Management

The capital management approach of the Microfinance is driven by its desire to maintain a strong capital base to support the development of its business and to meet the regulatory capital requirements at all times.

As Capital is the centerpiece of the Microfinance's performance matrix, a sound capital management forms the very core of the overall performance landscape to ensure that the Microfinance delivers on its objective of maximizing the shareholder's value. The senior management of the Microfinance is engaged and responsible for prudent capital management at all times.
